**Subject:** recent meeting in Joplin MO concering cleanup site

I was not able to attend recent meeting but did hear about it. Just wanted you to know, I do not agree that raising the levels of various contaminants is a good or safe idea. Also, you should provide people with additional information on how and what an above ground contaminant pile or area would look like before asking for blanket approval. Hopefully you will have another meeting and send out more publicity so more will attend.

Just expressing my thoughts. Thank you for your time.
